

ONLINE WEBINAR FOR POST PRIMARY TEACHERS

20AUT52 Analytics using Raw Data from the BBC micro:bit

This session covers Analytics (ALT2) collecting raw data from a micro:bit. We aim to cover fundamentals, pedagogical approaches and activities, to help you in your classroom for leaving certificate computer science. We will cover accessing data via the serial port from a micro:bit pre-processing of data, analysis of data and visualization of data using graphs. While we will cover content the goal is to work on how to deliver such content in the class, basing our approaches on “use, modify, create” and PRIMM with suitable take-home activities.

Date: Tuesday, 15 November 2020

Time: 6.00 – 8.00 pm
